

K-Love broadcasting on FM 88.7 here in Odessa is very important to me. During the time that they were temporarily off the air to change stations, I thought I would lose my mind. This community needs a station like K-Love so that people who do not enjoy other forms of music have something "good" to listen to. If this community didn't need this station, our local station would not be able to be broadcast because there would not be enough funds from this area to keep it. There is something very comforting in being able to hear this same stations in several cities when traveling, or being able to call my friend in Denver and be able to discuss something we both just heard on KLOVE. We would greatly miss having this station to listen to. Our children deserve the chance to have wholesome radio.

Thank you,
Lori Proffitt
